Overview

Versatile Backhoe Loader

This backhoe loader is a robust and versatile machine designed for demanding construction and agricultural environments. Featuring a dual-function design with a front-end loader and a rear-mounted excavator, it excels at digging, trenching, lifting, and material handling. Engineered for reliability and operator comfort, it offers customizable control options and high-performance hydraulic systems to tackle a wide variety of site tasks.

Performance & Hydraulics

Hydraulic Features

- Hydraulic output pipe at excavating boom (standard)
- Optional telescopic excavating boom

Drive System	4WD
Hydraulic Pump Options	Standard (Domestic), Optional (PERMCO)
Excavating Bucket Capacity	0.2 cbm

Engine & Drivetrain

Engine Options

- Weichai (Standard)
- Dongfeng Cummins (Optional)

Axle & Transmission	CARRARO
---------------------	---------

Operator Environment

Cab Features

- Enclosed driving cab
- Air Conditioner
- Heater (Optional)

Control Type

Mechanic Control (Standard) • Pilot Control (Optional)

Attachments

Loading Bucket Options

- Normal loading bucket with blade (Standard)
- 4-in-1 multi-purpose bucket (Optional)
- Bucket teeth (Optional)
