Overview

High-Performance Backlit LED Panel

The H20 series backlit panel is a high-performance LED lighting solution designed for a variety of indoor applications. It features a uniform light distribution that eliminates dark spots, creating a visually comfortable environment. This energy-efficient panel reduces electricity consumption and lowers operating costs, making it a cost-effective choice for modern facilities.

Technical Specifications

Color Rendering Index (Ra)	80 Ra
Glare Rating (UGR)	19
Color Consistency (SDCM)	4

Installation & Design

Design Features

- Classical luminaire design
- Slim profile
- Uniform light distribution

Mounting Options

Surface Mounted, Suspended, Recessed
