

Backpack Engine Tiller with Flexible Drive Shaft

This backpack engine tiller features a robust engine mounted on a backpack frame. Its flexible drive shaft connects the engine to the tiller head, allowing for precise control and maneuverability.

Product Overview

Professional Backpack Tiller

This backpack-type gasoline engine tiller features a hand-held working shaft designed for efficient weed removal from the root. Engineered for versatility, it is ideal for maintenance in tea gardens, orchards, and vegetable fields. With its innovative clutch system and durable 65Mn blade construction, it offers both operator safety and long-term reliability in complex terrains.

Technical Specifications

Gearbox Service Life

300 hours

Service Life

Safety Features
