

Bag Closing Stitching Machine

This high-speed bag closing machine is designed for efficient and reliable stitching of filled bags. It is suitable for closing bags made of paper, burlap, cotton, plastic, and woven polypropylene with a single-needle, double-thread chain stitch for secure closure.

Overview

High-Efficiency Bag Closing Solution

This high-speed bag closing machine is engineered for the reliable and efficient stitching of filled bags. Featuring robust construction and an automatic lubrication system, it ensures consistent performance in demanding environments. With an adjustable stitch length, this machine is versatile enough to handle a wide variety of bag materials, including paper, burlap, cotton, plastic, and woven polypropylene.

Technical Specifications

Stitch Type	Single-needle, double-thread chain stitch
Compatible Bag Materials	Paper, Burlap, Cotton, Plastic, Woven Polypropylene

Key Features

Core Features

- High-speed operation
- Automatic lubrication system
- Adjustable stitch length
- Robust, heavy-duty construction
