

Bagless Canister Vacuum Cleaner with HEPA Filter

This bagless canister vacuum cleaner features a transparent dust bin and automatic cordrewinder. It is equipped with a HEPA filter, hose swivel with 360° rotation, and speed control.

Product Overview

High-Efficiency Cleaning Performance

The BST-828 is a professional-grade bagless canister vacuum cleaner engineered for effective dust and debris management. It features a sophisticated HEPA filtration system to ensure cleaner air output while maintaining consistent suction power across various floor surfaces. Designed with user convenience in mind, the unit includes intuitive controls and a transparent dust bin for easy maintenance monitoring.
