

# Bagless Cyclonic Vacuum Cleaner with HEPA Filter

This vacuum cleaner utilizes cyclonic technology to efficiently separate dust and debris. It is equipped with a HEPA filter and an automatic dust release system.

## Product Overview

### High-Efficiency Cyclonic Cleaning

The YLC 53 Series is a professional-grade bagless cyclonic vacuum cleaner engineered for maximum suction performance. Utilizing advanced cyclonic technology, it effectively separates dust and debris from the air stream to prevent clogging and maintain optimal power. With an integrated HEPA filter and an automatic dust release system, this unit provides both superior allergen control and effortless maintenance.

## Key Features

### Technological Highlights

Cyclonic Separation, HEPA Filtration, Auto-Dust Release, Compact Design

## Operational Details

### Operation & Monitoring

- LED operational status indicator
- Transparent dust container for fill-level monitoring
- Maneuverable wheel system for easy handling
- Automatic dust container release

### System Status
