

# Bagless Cylinder Vacuum Cleaner

This compact bagless cylinder vacuum cleaner provides powerful suction for efficient cleaning. Its cyclonic filtration system separates dust and debris, while the HEPA filter captures allergens.

## Product Overview

### Compact High-Efficiency Cleaning

This bagless cylinder vacuum cleaner combines powerful suction with a lightweight, maneuverable design perfect for diverse environments. The advanced cyclonic filtration system maintains consistent airflow by separating debris from the air, while the integrated HEPA filter ensures the capture of fine allergens and particles. Designed for convenience, it features a transparent dustbin with a one-touch emptying mechanism and includes essential accessories for versatile surface cleaning.

## Performance

### Main Features

- Consistent suction power
- One-touch dustbin emptying
- Transparent dustbin for level monitoring
- Integrated carry handle

### Filtration Type

Cyclonic, HEPA

## Accessories

### Included Attachments

- Crevice tool
- Upholstery brush

## Design

### Physical Characteristics

Compact • Lightweight • Maneuverable
