

Bagless Cylinder Vacuum Cleaner

This cylinder vacuum cleaner provides 230W-280W of suction power with a 1.5L dust cup capacity. It operates at 100-120V or 220-240V / 50-60Hz and includes a 4.83m cable.

Product Overview

Professional Cleaning Performance

This bagless cylinder vacuum cleaner combines a powerful 700W motor with an exclusive 7-stage filtration system to ensure effective cleaning and cleaner air exhaust. Designed for modern maintenance, it features a washable dust cup and HEPA filters, eliminating the need for replacement bags. Its lightweight, ergonomic construction, paired with floor-protecting rubber wheels, offers superior maneuverability for various cleaning environments.
