

Bagless HEPA Filter Vacuum Cleaner

This vacuum cleaner has a sleek design with a digital display for settings and large wheels for smooth movement. Its bagless design and HEPA filtration system ensure efficient dirt collection and cleaner air exhaust.

Overview

Professional Cleaning Performance

This high-performance bagless vacuum cleaner delivers exceptional cleaning power with an adjustable 1200W-1800W motor. Designed for residential efficiency, it features a comprehensive 5-stage HEPA filtration system that ensures improved indoor air quality while capturing fine dust. The unit combines user-friendly controls with a low-noise design, making it an ideal solution for thorough floor and carpet maintenance.
