

Bagless Household Vacuum Cleaner

This vacuum cleaner is designed for household use. It features a bagless design, variable speed control, and HEPA filtration.

Product Overview

Efficiency Meets Performance

The YLC85 Series vacuum cleaner is a powerful and efficient cleaning appliance designed specifically for modern household use. This bagless model features a transparent dust container, allowing users to easily monitor dust levels and ensure timely emptying. Engineered for both health and convenience, it incorporates a HEPA filtration system to effectively capture fine particles and allergens.
