

Ball Joint Assembly with Mounting Bracket

This is a ball joint assembly with an integrated mounting bracket. The ball joint features a protective rubber boot, a threaded stud, and a retaining nut.

Product Overview

High-Durability Suspension Ball Joint

This ball joint assembly is engineered for heavy-duty suspension applications, featuring an integrated mounting bracket for secure vehicle installation. The component is constructed from robust forged steel and finished with a protective black coating to resist corrosion. Equipped with a protective rubber boot and threaded stud, it ensures reliable performance and longevity in demanding mechanical environments.

Technical Specifications

Material	Forged steel
Surface Finish	Black protective paint
Mounting Points	2
Key Features	Protective Rubber Boot, Threaded Stud, Integrated Mounting Bracket
