

Ball Peen Hammer with Wooden Handle

This ball peen hammer is designed with a rounded head for effective metal shaping. It also features a flat face for striking and a wooden handle for a comfortable, balanced grip.

Product Overview

Professional Ball Peen Hammer

This high-quality ball peen hammer is designed for precision metalworking and forging tasks. Featuring a classic wooden handle, it offers a comfortable grip and excellent balance for controlled swings. The dual-purpose head includes a rounded end for shaping metal and a flat face for striking, making it an essential tool for metal fabrication and shaping projects.
