

Ball Pein Hammer with Wooden Handle

This ball pein hammer is designed with a rounded peen for shaping metal and a flat face for striking. It features a wooden handle and a steel head, making it suitable for metalworking and forging.

Product Overview

Professional Grade Ball Pein Hammer

This ball pein hammer is engineered for precision and durability, featuring a high-quality carbon steel head designed for metalworking and forging applications. The tool includes a carefully selected wooden handle that provides a comfortable grip and effective shock absorption during use. With its dual-purpose design, it offers a flat face for striking and a rounded peen for shaping metal, making it an essential tool for metal fabrication tasks.
