

## Bar and Plate Core Intercooler

This intercooler enhances engine efficiency and power by cooling the intake air charge. It features a bar-and-plate core construction for optimal heat dissipation and reduced pressure drop.

### ADDITIONAL IMAGES

### Product Overview

#### High-Performance Intercooler

This bar-and-plate core intercooler is engineered to enhance engine efficiency by effectively cooling compressed intake air. Designed for optimal heat dissipation and reduced pressure drop, it helps increase air density for improved engine performance and reliability. Its durable aluminum alloy construction ensures consistent operation even under demanding conditions.

### Technical Specifications

Core Dimensions	720*195 mm
Water Tank Dimensions	7HO.145.804.A

### Compatibility

Compatible Vehicles	Transporter T5, Multivan
Production Year	2003

### Cross Reference

OEM Number	7HO.145.804.A
DPI Number	96683
Nissens Reference	56081
