

Bar and Plate Intercooler

This intercooler enhances engine efficiency and power. Its bar-and-plate core construction ensures optimal heat transfer and minimal pressure drop.

Product Overview

High-Performance Cooling Solution

This bar-and-plate intercooler is engineered to significantly enhance engine efficiency and power output for turbocharged and supercharged applications. Featuring a robust bar-and-plate core construction, it provides optimal heat transfer while minimizing pressure drop. The inclusion of cast aluminum end tanks ensures long-term durability and promotes efficient airflow throughout the system.

Technical Specifications

Construction Type	Bar and Plate
Material	Cast Aluminum
Compatible Vehicle Makes	FOTON, DONGFENG, HOWO
Fitment	Universal

Performance Metrics

Key Benefits

- Improved engine efficiency
- Enhanced power output
- Optimal heat transfer
- Reduced pressure drop
- Durable construction
