

Bathroom Heater with Exhaust Fan and Light

This multi-functional bathroom fixture combines heating, ventilation, and lighting into a single unit. It features four powerful heat lamps for rapid warmth, an exhaust fan for moisture removal, and a central light for illumination.

Product Overview

Integrated Bathroom Comfort Solution

This multi-functional bathroom fixture offers a streamlined, space-saving solution by combining rapid heating, efficient ventilation, and illumination into a single ceiling-mounted unit. It utilizes four high-output heat lamps to ensure immediate warmth, while the integrated exhaust fan effectively removes moisture to maintain optimal air quality. Designed for seamless installation, this versatile unit enhances both comfort and convenience in any modern bathroom environment.

Technical Specifications

Efficiency Metrics

- Reflective heating distribution
- Moisture-wicking exhaust fan
- Rapid warm-up capability

Heating Mechanism	4-lamp infrared heating system
Core Features	Heating, Exhaust Ventilation, Integrated Lighting
Mounting Style	Ceiling Mount
Exhaust Method	Ducting integrated
