Product Overview

Integrated Bathroom Climate Control

This advanced ceiling-mounted system combines high-efficiency ventilation, powerful PTC heating, and integrated LED lighting into one unit. Engineered for quiet operation, it utilizes a sophisticated five-dimensional noise reduction design to ensure a peaceful bathroom environment. It is the ideal solution for modern residential and commercial spaces requiring reliable air circulation and temperature regulation.

Technical Specifications

Noise Level

36 dB

Noise Level

Heating Technology

PTC Heater

Power Rating

2100 W

Net Weight

4.6 Kg

Core Components

High-efficient bearing, Biomimetic impeller blade, Oblique and annular air duct, Guide ring inlet, Sound absorption duct plate

Noise Reduction Design

Five-Dimensional Noise Control

- Motor noise removal
- Resonant noise decline
- Air duct noise decline
- Airflow noise prevention
- Pneumatic noise suppression
