

# Bathtub Circulation Pump

This high-performance circulation pump is designed for bathtubs and spas. It is engineered for quiet operation and efficient water circulation, ensuring optimal performance and longevity.

## Product Overview

### High-Performance Circulation Solution

This high-performance circulation pump is specifically engineered for use in bathtubs and spa applications. It features a robust, durable construction with a stainless steel motor housing that provides excellent corrosion resistance. Designed for both longevity and efficiency, this unit ensures reliable water circulation while maintaining quiet operation for a better user experience.

## Technical Specifications

Motor Housing Material	Stainless steel
Durability Features	Corrosion-resistant, Durable construction, Quiet operation

## Applications

### Suitable Environments

- Bathtubs
- Spas

## Product Identification

Model Series  
LX Series
