Product Overview

High-Performance Whirlpool Circulation

This bathtub whirlpool circulation pump is engineered for efficient water circulation and reliable operation in compact hydromassage units. Built with corrosion-resistant materials like stainless steel and polypropylene, it ensures long-lasting performance in demanding environments. The unit features a robust, asynchronous motor designed for quiet, continuous operation, providing optimal jet power for a relaxing bathing experience.

Technical Specifications

Protection Rating

IP 55

Motor Type

Asynchronous, two poles

Insulation Class

Class F

Operation Mode

Continuous

Thermal Protection

Yes

Materials

Material Breakdown

Component	Material
Suction/Discharge Mountings	Polypropylene
Motor Shaft	Stainless Steel AISI-420
Impeller	PP
Mechanical Seal	Graphite and Ceramic
Motor Housing	Aluminium L-2521

Applications

Recommended Applications

Hydromassage Units, Whirlpool Bathtubs, Water Circulation
