

Bathtub Whirlpool Pump

This high-performance bathtub whirlpool pump is designed for efficient water circulation and quiet operation. It features durable construction, an optimized impeller design, and a reliable motor for long-lasting performance.

Product Overview

High-Performance Hydromassage Solution

This bathtub whirlpool pump is engineered for compact hydromassage units, delivering efficient water circulation and reliable performance. Built with high-quality materials including a stainless steel shaft and durable polypropylene components, it ensures long-term operational stability. Designed for continuous use, the pump features integrated thermal protection and robust motor housing to meet the demands of professional spa and bathtub applications.

Motor Specifications

Protection Rating

IP 55

Motor Type

Asynchronous, two poles

Insulation Class

Class F

Operational Mode

Continuous operation

Safety Features

Built-in thermal protection

Construction Materials

Material Breakdown

Component	Material
Suction and discharge mountings	Polypropylene
Motor shaft	Stainless steel AISI-420
Impellor	PPO
Mechanical seal	Graphite and ceramic
Motor housing	Aluminium L-2521

Applications

Primary Applications

- Compact hydromassage units
- Bathtub circulation systems
- Spa equipment
