

Battery and Charger Component Set

This set contains components for constructing batteries and chargers. It includes cylindrical housings, rectangular casings, insulators, and metal contacts.

Product Overview

Comprehensive Battery Component Assembly Kit

This professional-grade component set provides all essential elements required for the assembly and maintenance of various battery types. The kit includes a diverse range of cylindrical housings, rectangular casings, and critical internal hardware like metal contacts and insulators. Designed for manufacturers and repair specialists, this collection ensures high-quality assembly standards across multiple battery form factors.

Technical Specifications

Included Components

- Cylindrical battery housings
- Rectangular 9V battery casings
- Plastic insulators
- Metal contact terminals
- Assembly hardware

Primary Applications

Battery Assembly • Component Repair • Prototyping • Manufacturing Maintenance

Supported Battery Sizes

AA, AAA, C, D, 9V
