

Battery Charger

This battery charger efficiently replenishes power for various electronic devices. It provides a reliable power source, ensuring devices are ready for use.

Product Overview

High-Performance Rotary Tablet Press

This high-speed rotary tablet press is engineered for efficient and precise tablet manufacturing across pharmaceutical, nutraceutical, and chemical industries. It features multiple stations to maximize output capacity and is built with durable stainless steel to ensure hygiene and longevity. Advanced control systems allow operators to monitor and fine-tune critical tablet parameters, including weight, thickness, and hardness, ensuring consistent production quality.

Technical Specifications

Key Features

- High-speed rotary operation
- Multiple stations for increased output
- Automated feeding system
- Automated discharge system
- Advanced parameter monitoring and control

Construction Material	Stainless Steel
Adjustable Parameters	Tablet Weight, Tablet Thickness, Tablet Hardness

Applications

Industry Suitability

Pharmaceutical • Nutraceutical • Chemical
