

Battery Charger

This device is a battery charger. It is used to recharge batteries.

Overview

Professional Battery Charging Solution

This high-performance battery charger is designed to meet the rigorous demands of professional and industrial applications. Engineered for efficiency and reliability, it ensures optimal charging cycles to extend battery lifespan and maintain peak performance. Its robust construction makes it a dependable choice for various operational environments.

Technical Specifications

Device Type	Battery Charger
Compliance Standards	CE, RoHS, ISO 9001

Operational Metrics

Performance Metrics

12 V Input Voltage	5 A Charging Current
