Product Overview

Universal Charging Solution

This high-performance charging unit is engineered to support a wide range of battery capacities, including 2.5Ah, 5.0Ah, 7.5Ah, and 20Ah models. Designed for professional utility, the charger ensures efficient power management with a built-in digital monitoring system. It provides precise status feedback for seamless operation across compatible 40-Volt power equipment.

Compatibility & Technical Specs

Supported Battery Capacities

- 2.5Ah
- 5.0Ah
- 7.5Ah
- 20Ah

| | |
|---------------------------|--------|
| System Voltage | 40 V |
| Power Cord Thermal Rating | 105 °C |

Operational Features

Battery Level Status

Monitoring System

Digital Capacity Display, Battery Level Indicators, Temperature Monitoring, Overheat Warning
