Product Overview

Eco-Friendly Kinetic Power

This innovative bathroom scale eliminates the need for batteries by utilizing an advanced Auto-Power Generation System that converts kinetic energy into electricity. Designed with safety and sustainability in mind, it removes the risks associated with chemical leakage or accidental battery ingestion by children. Featuring a high-precision sensor, it provides accurate measurements for weight and key body composition metrics, making it an essential tool for comprehensive health management.

Technical Specifications

Advanced kinetic energy technology powers the scale, eliminating the need for batteries while ensuring environmental safety.

Weight Capacity

200 kg

Max Capacity

8 kg

Min Capacity

Measurement Precision	0.1 kg
Physical Dimensions	336 x 295 x 25 mm
Platform Material	6mm high-strength tempered glass
Tested Lifespan	Over 50,000 operations

Health Monitoring

Supported Health Data

- Body Weight
- BMI
- Muscle Mass
- Body Fat
- Body Water
- Bone Mass

Features

Power Source

Battery-Free • Kinetic Energy • Auto-Power Generation
