Power & Environment

The K1708 utilizes kinetic energy generation, featuring a 5kg capacity and an eco-friendly unibody design.

Power System

U-Power G6 Automatic Generation Control (Battery-Free)

Environmental Benefits

No Carbon Footprint, Battery-Free, Chemical Leakage Protection, Child Safe

Design & Build

Construction Details

- Stainless steel weighing platform
- Seamless unibody design
- Rotating LCD display interface
- Reengineered power button

Product Dimensions

250 x 182 x 32 mm

Functional Features

User Interface

- Tare function for zeroing weight
- Unit conversion (g/oz)
- High-definition LCD display
- Touch-sensitive control panel

Safety Features

Child-Safe Design • Leakage-Free • Stable Sensor Technology
