

Battery Hold Down J-Bolts Kit

Battery hold down J-bolts are designed to secure the battery in place. The kit includes two J-bolts, two wing nuts, and two rubber washers.

Product Overview

Secure Battery Retention Solution

This battery hold down J-bolt kit provides a robust and reliable method for securing automotive batteries. Engineered for stability, the kit prevents movement during vehicle operation, ensuring consistent electrical connections and protecting the battery casing from damage. The assembly is designed for ease of use, featuring quick-tightening wing nuts and included washers for a complete installation.
