

Battery Jumper Cable Clamps

These heavy-duty clamps are designed for battery jumper cables. Their durable construction ensures strong gripping power and reliable connections.

Product Overview

Heavy-Duty Jumper Cable Clamps

These heavy-duty battery jumper cable clamps are engineered for secure and reliable electrical connections. Built with durability in mind, they offer strong gripping power suitable for demanding automotive, marine, and industrial environments. The design includes color-coded insulation to ensure quick and safe identification of positive and negative terminals during operation.

Technical Specifications

Key Features

- Heavy-duty construction
- Strong gripping power
- Color-coded insulation

Model Number	ST-05
Suitable Applications	Automotive, Marine, Industrial
