

Battery Powered Liquid Transfer Pump

This battery-powered pump provides a portable solution for transferring liquids such as fuel, oil, diesel, and water. It operates on batteries and ensures a fast transfer rate.

Product Overview

Efficient Liquid Transfer Solution

This battery-powered liquid transfer pump offers a cordless, no-mess solution for moving non-corrosive liquids quickly and easily. Designed for convenience, it features automatic fill or siphon capabilities controlled by a simple power switch. With a transfer rate of 10 liters per minute, it is an ideal tool for automotive maintenance, lawn care, and general fluid handling tasks.

Performance Specifications

Transfer Capacity

10 L/min
Flow Rate

Hose Length	60cm / 24 inches
-------------	------------------

Power & Operation

Power Requirements	2x D-cell Alkaline batteries (not included)
--------------------	---

Activation	Power switch
------------	--------------

Compatibility

Compatible Liquids	Gas, Oil, Diesel, Water
--------------------	-------------------------

Usage Restriction	For use with non-corrosive liquids only
-------------------	---

Design Features

Key Features

- Cordless design for portability
- Automatic fill or siphon function
- No-mess operation
- Fast and easy to use
