Product Overview

Battery-Powered Strapping Solution

This battery-powered plastic strapping tool is designed for efficient tensioning, sealing, and cutting of plastic straps without the need for external fasteners. By eliminating the need for wires or air pumps, it offers complete portability for packaging operations in any location. Its high degree of automation and ergonomic design ensure simple operation and consistent results for professional logistics and industrial applications.

Technical Specifications

Key Features

- Thermal friction welding
- Adjustable tension force
- Adjustable sealing time
- Battery-powered portability
- No external fasteners required

Compatible Strap Types	PP, PET
Strap Width	13mm - 16mm

Applications

Suitable Industries

Paper • Aluminum • Textile • Steel • Logistics • Agriculture • Chemical • Metal
