

BD-R 25GB Blu-ray Recordable Disc

This BD-R disc is a write-once optical storage medium. It uses blue-violet laser technology and offers a storage capacity of 25GB with a 2x write speed.

Product Overview

High-Definition Optical Storage

This Blu-ray Recordable (BD-R) disc is engineered for reliable, high-capacity data storage, utilizing blue-violet laser technology to achieve superior density compared to traditional DVD formats. It provides a robust solution for archiving high-definition video, large data backups, and professional media projects. Designed for write-once applications, it ensures data integrity for long-term storage requirements.
