

Bean-to-Cup Self-Service Coffee Maker

This bean-to-cup coffee maker is designed for self-service operation. It provides single servings of freshly brewed coffee from whole beans.

Overview

Compact Self-Service Brewing Solution

This bean-to-cup self-service coffee maker is engineered for high-quality single-serve brewing in a space-efficient design. Featuring a sleek black exterior with durable stainless steel accents, it offers an intuitive user experience with a top-mounted power button and easy-access dispensing. It is an ideal solution for environments requiring consistent coffee quality, such as small offices or home settings.
