

Bean-to-Cup Self-Service Coffee Maker

This bean-to-cup, self-service coffee maker is designed in the American style. It features an integrated coffee bean grinder and a thermal carafe to keep coffee hot for extended periods.

Overview

Professional Self-Service Coffee Solution

The HS1000A is a versatile bean-to-cup coffee maker designed for high-efficiency self-service environments. Combining an integrated grinder with a high-capacity thermal carafe, it ensures every cup is brewed from freshly ground beans and maintained at the ideal temperature. Its intuitive push-button interface makes it an excellent choice for both commercial office settings and demanding home use.
