

Bearing Accessory Set with Cage and Races

This bearing accessory set includes a ball bearing cage and two bearing races. The components are made of durable metal and are designed for use in machinery requiring rotational movement.

Product Overview

Precision Bearing Accessory Set

This bearing accessory set is engineered for high-performance industrial machinery, featuring a robust ball bearing cage and two precision-machined races. Designed to facilitate smooth rotational movement, these components effectively minimize friction and enhance the operational efficiency of your equipment. Crafted from durable, high-grade metal, this set ensures long-term reliability and consistent performance in demanding industrial environments.

Technical Details

Included Components

- Ball bearing cage
- Bearing race (inner)
- Bearing race (outer)

Material	Durable Metal (Steel)
----------	-----------------------

Application & Usage

Primary Function	Reduction of friction in rotational machinery
Suitability	Industrial Machinery, Rotational Equipment, Maintenance & Repair
