

Beer Bottle Manufacturing Mold

This high-precision mold is designed for manufacturing beer bottles. It is crafted from durable materials to ensure consistent bottle dimensions and quality.

Product Overview

High-Precision Beer Series Mould

This high-precision mould is specifically engineered for the efficient manufacturing of beer bottles. Crafted from durable, high-quality materials, it ensures consistent bottle dimensions and reliable performance in high-volume production environments. The multi-part construction facilitates easy bottle extraction, while specialized surface treatments enhance wear resistance and reduce friction during the moulding process.

Technical Specifications

Surface Treatments

Wear-resistant • Low-friction

Application	Beer Bottle Manufacturing
Construction Features	Multi-part construction, High-precision cavity, Automated system compatible

Production Capability

Production Environment	High-volume manufacturing
