

Behind-the-Neck Headphones with 40mm Drivers

These behind-the-neck headphones deliver clear audio through 40mm drivers. Designed for comfort, they feature a flexible headband and soft earcups suitable for extended use.

Product Overview

Designed for Comfort and Clarity

These behind-the-neck headphones are engineered for extended wear, featuring a lightweight design with soft earcups and a flexible headband. Equipped with 40mm drivers, they deliver balanced audio performance suitable for both communication and entertainment. The integrated omnidirectional microphone ensures clear voice capture, making them a reliable choice for professional and personal use.
