

Bellow Seal Gate Valve

This bellow seal gate valve is designed for demanding industrial applications. It is suitable for use with water, steam, and hot oil.

Product Overview

High-Performance Bellow Seal Gate Valve

This API standard bellow seal gate valve is engineered for demanding industrial applications requiring zero leakage to the atmosphere. By utilizing a robust bellows seal design, the valve effectively prevents fugitive emissions and ensures compliance with strict environmental regulations. Its durable construction is suitable for high-temperature and high-pressure services, offering a reliable, low-maintenance solution for critical fluid flow control.

Technical Specifications

Pressure Rating
150lb

Valve Type	Bellow Seal Gate Valve
------------	------------------------

Connection Type	Flange End
-----------------	------------

Materials

Body Materials	WCB (Carbon Steel), CF8 (Stainless Steel), CF8M (Stainless Steel)
----------------	---

Compliance & Standards

Design Standards

- API Standard Design
- ASME B16.5 (Flange Connections)
