

Belt Sander with 2800 RPM

This belt sander delivers high performance with a 2800rpm belt speed. It features a quick belt change system and a structure to prevent belt deviation.

Overview

High-Performance Belt Sander

This high-performance belt sander is engineered for efficiency and precision in wood processing tasks. Featuring a robust motor capable of dual-speed operation at 1400 and 2800 RPM, it provides the versatility needed for both rough material removal and fine finishing. The inclusion of a dedicated stand and a quick-change belt system makes it a practical solution for professional workshops.
