

Bench Drilling Machine for Metalworking

This industrial-grade bench drilling machine is designed for precision drilling in metalworking applications. The adjustable worktable allows for versatile workpiece positioning, and the multiple speed settings enable optimal drilling speeds for different materials and drill bit sizes.

Product Overview

Precision Bench Drilling Machine

This industrial-grade bench drilling machine is engineered for high-precision metalworking applications. Built with high-quality cast iron for the spindle head, column, and base, it ensures exceptional durability, stability, and consistent performance. Its robust design makes it an ideal solution for specialized manufacturing environments, including instrument and camera production.

Construction & Build

Primary Material	High-quality cast iron
Cast Iron Components	Spindle Head, Column, Base

Performance & Features

Typical Applications

Instrument Manufacturing • Camera Production • Metalworking

Safety Equipment

- Chuck guard
- Emergency stop button

Operational Capabilities

- Adjustable worktable
- Multiple speed settings
- High precision drilling
