

Bench Drilling Machine with Adjustable Speed

This bench drilling machine is designed for precision drilling tasks. It features a robust construction, adjustable speed settings, and a compact footprint suitable for workshops with limited space.

Overview

Precision Bench Drilling

This bench drilling machine is engineered for high-precision drilling tasks in professional workshop environments. Featuring a robust build and a compact footprint, it is an ideal solution for facilities with limited space. The machine offers adjustable speed settings and excellent control, making it suitable for drilling a variety of materials with consistent accuracy.

Technical Specifications

Max Drilling Diameter	4 mm
Supported Frequencies	50Hz, 60Hz
Model Identifier	Z4004A

Performance Metrics

Spindle Speed Ranges

Gear Level	Speed (50Hz)	Speed (60Hz)
I	2800	3400
II	1600	1900
III	900	1100
IV	400	500
