

Bench Drilling Machine with Variable Speed

This bench drilling machine is designed for precise drilling operations. It features variable speed settings to accommodate different materials and drill bit sizes.

Product Overview

Precision Bench Drilling

This bench drilling machine is engineered for high-precision drilling operations in professional workshop environments. Featuring a robust motor and a sturdy base, it ensures stability and accuracy during use. The variable speed settings allow operators to easily adapt to different materials and drill bit sizes, while the manual lever provides excellent control over drilling depth.

Technical Specifications

Max Drilling Diameter	4 mm
Supported Frequencies	50Hz, 60Hz

Performance Metrics

Available Spindle Speeds

- 1400
- 1700
- 2800
- 3400
- 5600
- 6800

Speed Control

Variable Speed
