

Bench Drilling Machine

This industrial-grade bench drilling machine is designed for precision drilling in metal and other materials. The adjustable worktable allows for accurate positioning of the workpiece, while the depth stop ensures consistent drilling depths.

Product Overview

Industrial Bench Drilling Machine

This industrial-grade bench drilling machine is designed for high-precision drilling tasks in metal and various other materials. Built with a robust cast iron spindle head, column, and base, it ensures exceptional durability and stability during operation. Its high precision makes it an ideal choice for specialized applications in instrument and camera manufacturing sectors.

Construction & Materials

Durability Profile

Industrial Grade • High Stability • Everlasting

Build Materials

Cast Iron Spindle Head, Cast Iron Column, Cast Iron Base

Performance Features

Common Applications

- Instrument Manufacturing
- Camera Component Production
- General Metalworking
- Workshop & Factory Use

Operational Features

- Variable speed control
- Adjustable worktable
- Depth stop for consistent drilling
- Chuck guard
- Emergency stop button
