

Bench Grinder

Bench grinders are versatile power tools used for sharpening, grinding, and polishing various materials. They feature two abrasive wheels, one coarse for rough grinding and one fine for finishing.

Overview

Versatile Bench Grinding Solutions

These bench grinders are essential power tools designed for sharpening, grinding, and polishing a variety of materials in professional workshops and garages. Featuring robust induction motors, these units provide consistent performance for shaping metal, removing rust, and maintaining sharp tool edges. Available in multiple configurations, they offer reliable operation for demanding metalworking tasks.

Technical Specifications

Motor Type

Induction Motor

Voltage & Frequency

230V ~ 50Hz

No-Load Speed

2950 rpm

Model Comparison
