

Bench Grinder

This bench grinder is designed for sharpening tools and shaping materials. It features dual grinding wheels, adjustable tool rests, and safety shields.

Product Overview

Professional Bench Grinder

This high-performance bench grinder is engineered for precision sharpening, shaping, and material removal tasks. Featuring a robust, stable base and dual grinding wheels, it provides consistent results for various metalworking applications. The unit is equipped with integrated safety shields and adjustable tool rests, ensuring operator protection and workflow efficiency for demanding workshop environments.

Key Features

Safety and Control

- Integrated safety shields
- Adjustable tool rests
- Centralized on/off power switch

Primary Applications

Sharpening, Shaping, Material Removal, Metalworking

Construction

Design Type

Bench-mounted

Base Construction

Sturdy heavy-duty base for vibration reduction
