

# Bench Grinder and Polisher

This bench grinder and polisher is designed for sanding and polishing various materials. Its compact design and adjustable angle settings allow for accurate and consistent results on DIY projects and in professional workshops.

## ADDITIONAL IMAGES

## Product Overview

### Professional Bench Grinder and Polisher

This versatile bench grinder and polisher is designed for precision sanding and finishing tasks in professional workshops. Featuring a step-less speed control system across six levels, it offers adaptability for various materials and work environments. The unit is built for efficiency and cleanliness, including compatibility with dust suction systems to minimize air pollution during operation.

## Technical Specifications

Input Voltage	AC 230V 50Hz
Power Rating	140 W
Speed Control	6-level step-less adjustment
Working Duty Cycle	S2 = 15 min

## Design and Build

### Key Features

- Lightweight high-strength body
- Nylon housing with soft grip
- Dust-proof switch cover
- Dust extraction port

Sanding Disc Diameter	125 mm
Disc Material	Aluminum with Velcro Pad
Power Cable Length	2 m

## Compliance

Certifications	GS, CE, EMC
