

# Bench Grinder for Material Removal and Finishing

This bench grinder is a stationary power tool used for grinding, polishing, and sharpening. It features two abrasive wheels rotating at high speed, allowing for various material removal and finishing tasks.

## Overview

### Professional Bench Grinder

This stationary power tool is engineered for high-performance grinding, polishing, and sharpening tasks. Equipped with dual abrasive wheels, it offers the precision and control necessary for shaping metal components and maintaining sharp edges on tools. It is an essential addition to any professional workshop or garage environment for efficient material removal and finishing.

## Technical Details

### Wheel Configuration

Dual Wheel

### Tool Type

Stationary Power Tool

### Primary Applications

Grinding, Polishing, Sharpening, Material Removal, Finishing
