Product Overview

Versatile Wet & Dry Grinding Solution

This Bench Grinder is a versatile tool engineered for both wet and dry applications, making it ideal for sharpening garden tools, workshop drills, and general metal shaping. It features a robust motor for consistent performance and integrated water cooling to prevent workpiece overheating during extended use. Designed with operator safety and stability in mind, it includes adjustable shields and vibration-dampening rubber feet.

Performance & Capability

Key Performance Metrics

36 Grit

Coarse Grinding Wheel

60 Grit

Fine Grinding Wheel

Applications

Common Applications

- Sharpening garden tools
- Sharpening workshop drills
- General metal grinding
- Metal shaping
- Smoothing surfaces

Safety & Design

Stability & Mounting

- Base with mounting holes for secure bench bolting
- Rubber feet to dampen vibration
- Adjustable tool rests for workpiece support

Safety Equipment

Adjustable Eye Shields, Spark Guards, Spark Deflectors, Wheel Guards

Technical Construction

Motor Performance

Robust Motor • Consistent Performance

Bearing System

Permanently lubricated ball bearing for long life

Cooling Method

Wet grinding attachment with integrated water tray
