

Bench Grinder Power Tool

A bench grinder is a stationary power tool used for grinding, polishing, and sharpening tools. It features two abrasive wheels mounted on a motor-driven spindle, typically with adjustable tool rests and safety shields.

Product Overview

Professional Bench Grinder

This stationary bench grinder is an essential power tool designed for precision grinding, polishing, and sharpening tasks. Equipped with a high-performance motor-driven spindle and dual abrasive wheels, it provides consistent power for shaping objects and maintaining cutting edges. Its robust design, featuring adjustable tool rests and protective safety shields, makes it a reliable addition to any professional workshop, garage, or metalworking environment.

Technical Specifications

Tool Category	Stationary Power Tool
Key Applications	Grinding, Polishing, Sharpening
Wheel Setup	Dual Abrasive Wheels

Safety & Design

Safety Components

- Adjustable tool rests
- Safety shields

Suitable Environments

Workshops • Garages • Metalworking Facilities
