

Bench Grinder with Abrasive Wheels

This bench grinder is a stationary power tool for grinding, polishing, and sharpening tasks. It features two abrasive wheels on a motor-driven spindle, along with adjustable tool rests and safety shields.

Overview

Professional Bench Grinder

This stationary bench grinder is a versatile power tool engineered for heavy-duty grinding, polishing, and sharpening tasks. Equipped with dual abrasive wheels on a motor-driven spindle, it provides consistent performance for shaping metal, removing rust, and maintaining cutting tools. Designed with safety in mind, it includes adjustable tool rests and protective shields to ensure operator precision and security in demanding workshop environments.
