

Bench Grinder with Pedestal Base

This heavy-duty bench grinder is mounted on a sturdy pedestal base. It is ideal for sharpening, shaping, and smoothing metal objects in various industrial and workshop applications.

Product Overview

Industrial-Grade Bench Grinder

This heavy-duty bench grinder is designed for precision sharpening, shaping, and smoothing of metal components in industrial environments. It features a robust pedestal base for stability and dual grinding wheels for versatile applications. Equipped with safety shields and adjustable tool rests, this unit balances high performance with essential operator protection.

Technical Specifications

Common Applications

- Metal Sharpening
- Metal Shaping
- Surface Smoothing

Mounting Type	Pedestal Base
Number of Wheels	2

Safety and Design

Safety Equipment	Safety Shields, Adjustable Tool Rests
